Dione è una collezione che incarna l'equilibrio tra design moderno e funzionalità, unendo armoniosamente estetica e praticità in una singola, raffinata soluzione luminosa. La sospensione è composta da tre elementi distinti. Due dischi in vetro sovrapposti creano un gioco di forme che cattura l'occhio, mentre il terzo elemento alla base, custodisce la sorgente LED che diffonde una luce d'ambientale, avvolgendo lo spazio in un'atmosfera calda e accogliente. La parte inferiore ospita una seconda sorgente, che proietta sul piano una luce direzionale. I tre elementi sono uniti da cavi elettrici, lungo i quali è possibile posizionare i primi due elementi all'altezza desiderata creando ogni volta forme ed equilibri sempre nuovi.

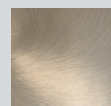

Dione is a collection that embodies the balance between modern design and functionality, harmoniously combining aesthetics and practicality in a single, refined lighting solution. The pendant light consists of three distinct elements. Two overlapping glass discs create an interplay of shapes that captivate the eye, while the third element at the base houses the LED source, diffusing ambient light that envelops the space in a warm and welcoming atmosphere. The lower part contains a second light source that projects a directional beam onto the surface below. The three elements are connected by electrical cables, along which the first two elements can be positioned at the desired height, allowing for ever changing shapes and balances.

Globose è una collezione dinamica e versatile che permetta di distribuire i punti luce in uno spazio a 360°. La sospensione gioca sull'equilibrio tra due elementi esteticamente contrastanti: la rigidità della struttura e la morbidezza delle forme dei diffusori in vetro soffiato. La montatura a sezione quadrata, si sviluppa in modo fluido e continuo, creando linee ortogonali che si intrecciano e si richiudono su sé stesse, mentre i diffusori sono disposti in modo da enfatizzare il contrasto tra la loro forma naturale e l'architettura rigida della struttura. I diffusori di diametro 20 cm sono elettrificati da un solo cavo di alimentazione.

Globose is a dynamic and versatile collection that allows light points to be distributed in a space at 360°. The suspension plays on the balance between two aesthetically contrasting elements: the rigidity of the structure and the softness of the blown glass diffusers. The square-section frame develops fluidly and continuously, creating orthogonal lines that intertwine and fold back on themselves, while the diffusers are arranged to emphasize the contrast between their natural shape and the rigid architecture of the structure. The 20 cm diameter diffusers are powered by a single power cable.

JEFF è l'espressione pura del design contemporaneo, una sospensione componibile che trasforma la luce in arte e l'arte in luce. Con la sua anima LED, vestita di puro cristallo, JEFF illumina con eleganza e trasforma ogni ambiente in uno spazio d'ispirazione. La collezione si fonda su più elementi dalle forme allungate e altri dalla forma a goccia — che, ripetuti e combinati, offrono infinite possibilità creative. Accesa, JEFF rivela linee sinuose e dinamiche; spenta, diventa una scultura unica, capace di arredare con personalità e fantasia qualsiasi spazio. Un componibile pensato per chi non teme di osare, capace di dare vita a configurazioni in continuo mutamento, perfette per l'eleganza del design contemporaneo.

JEFF is the pure expression of contemporary design, a modular suspension that transforms light into art and art into light. With its LED core, dressed in pure crystal, JEFF illuminates with elegance and transforms any space into an inspiring environment. The collection is based on multiple elongated elements and others in a drop shape — when repeated and combined, they offer endless creative possibilities. When turned on, JEFF reveals sinuous and dynamic lines; when turned off, it becomes a unique sculpture, capable of furnishing any space with personality and imagination. A modular piece designed for those who dare to be bold, capable of creating ever-changing configurations, perfect for the elegance of contemporary design.

5x2W **LED**

Link è una collezione poliedrica e versatile, composta da singoli elementi che offrono infinite possibilità di configurazione. I cerchi di cristallo con lavorazione martellata si intersecano tra loro, grazie ad un particolare sistema di aggancio, dando vita a catene di luce e vetro che si adattano a qualsiasi spazio. Ogni modulo rappresenta la parola chiave del design, mentre l'incastro diventa l'elemento strategico che ne definisce la struttura, creando una sintassi luminosa che si evolve in base alle esigenze stilistiche e architettoniche.

Link is a multifaceted and versatile collection, composed of individual elements that offer infinite configuration possibilities. The hammered crystal rings intersect with each other, thanks to a special coupling system, creating chains of light and glass that adapt to any space. Each module represents the key word of the design, while the interlocking mechanism becomes the strategic element that defines the structure, creating a luminous syntax that evolves according to stylistic and architectural needs.

Geometrie moderne, che ricordano la forma di una lanterna. Grazie a un particolare sistema di aggancio, che nasconde perfettamente la montatura e permette di fissare i vetri senza forature, i due diffusori di cristallo bianco sfumato possono essere composti in quattro configurazioni diverse, giocando con la sorgente interna e le trasparenze del vetro nella versione a sospensione. La collezione è stata ampliata con una nuova versione tavolo. Una lampada scultorea che crea atmosfere coinvolgenti grazie al vetro sfumato quando accesa e un oggetto di design che arreda quando spenta.

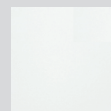

Modern geometries reminiscent of a lantern shape. Thanks to a special mounting system that perfectly conceals the frame and allows the glass to be secured without drilling, the two frosted white crystal diffusers can be arranged in four different configurations, playing with the internal light source and the glass's transparency in the pendant version. The collection has been expanded with a new table version. A sculptural lamp that creates captivating atmospheres when lit, thanks to the frosted glass, and a design object that enhances the space even when turned off.

La silhouette e i giochi di sovrapposizioni di diversi materiali ricordano le forme leggiadre e armoniche del movimento della medusa. Il vetro soffiato del diffusore, dalle dimensioni generose, nasconde un paralume interno in tessuto. Un gioco di trasparenze, toni di colore e texture che per la sua ricercatezza rende Plissé un elemento elegante e caratterizzante degli ambienti in cui viene inserita. Disponibile come sospensione e parete con sorgente LED.

The silhouette and the play of overlapping different materials are evocative of the graceful and harmonious shapes of the jellyfish's movement. The blown glass of the oversized diffuser encloses an inner fabric lampshade. An effect of transparencies, shades and textures, whose preciousness makes Plissé an elegant and characteristic element of the spaces where it is installed. Available as suspension and wall lamp with LED source.

Una collezione dai connotati contemporanei che racchiude preziosi contenuti storici della lavorazione del vetro quali il "balloton" e il rigadin dritto e ritorto.

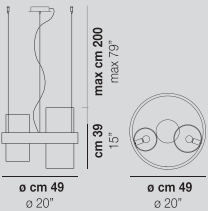

A collection with contemporary connotations that contains precious historical features: that of glass processings such as the "balloton" and the straight and twisted rigadin.

La collezione prende ispirazione dal design rigoroso di linee e superfici del minimalismo dei primi anni '60. Forme regolari si contrappongono a elementi più morbidi attraverso il sapiente uso delle finiture metalliche e la lavorazione del vetro. La struttura è stata pensata per consentire grande flessibilità grazie a un sistema di aggancio dei quattro frame metallici, che, scorrendo, creano geometrie sempre nuove.

The collection is inspired by the rigorous design of lines and surfaces of early 1960s minimalism. Regular shapes are contrasted with softer elements through the skillful use of metal finishes and glass fabrication. The structure has been designed to allow great flexibility thanks to a system of fixing of the four metal frames, which, by sliding, create ever new geometries.

Collezione dal fascino vintage, composta da quattro tipologie: sospensione, parete, tavolo e terra, tutte con sorgente luminosa LED. I due diffusori a sospensione più grandi sono disponibili anche in una versione alternativa che abbinata un secondo diffusore in vetro bianco così da sembrare un pezzo unico.

The vintage-inspired collection consists of suspension, wall, table, and floor lamps, all with integrated LED light sources. The two larger pendants are also available in an alternative version that combines a second white glass diffuser to create a single-piece appearance.

L'aspetto elegante e delicato del vetro soffiato trova in Jube una nuova dimensione. Due vetri accostati, perfettamente assemblati, da sembrare un pezzo unico. Una lampada sinuosa, con colori tono su tono che le regalano un prezioso mood vintage.

The elegant and delicate look of the blown glass finds a new dimension in Jube. Two glass units placed side by side, so perfectly assembled, that they look like a unique piece. A sinuous lamp, with tone-on-tone colours that give it a precious, vintage mood.

Collezione che propone elementi con due geometrie a esagono irregolare nelle versioni a sospensione, soffitto e parete. Nelle ultime due tipologie la forma smussata permette di combinare le due dimensioni insieme per creare infinite configurazioni. Nelle versioni a parete e soffitto, i frame disponibili per alcune versioni, nascondono i cablaggi e permettono il decentramento degli elementi con un'unica uscita cavi. Il LED integrato garantisce un'illuminazione diffusa, uniforme e non abbagliante.

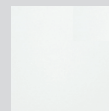

This collection features elements with two irregular hexagonal geometries in suspension, ceiling, and wall versions. In the last two types, the beveled shape allows for combining both sizes to create endless configurations. In the wall and ceiling versions, frames available for certain models hide the wiring and allow for the decentralization of elements with a single cable outlet. The integrated LED provides diffuse, uniform, and non-glare lighting.

Collezione dalle forme semplici, resa unica dalla preziosa lavorazione che utilizza una membrana interna orizzontale, la quale divide la sfera di cristallo trasparente in due metà. Ogni pezzo è unico, poiché la curvatura della membrana durante la soffiatura del vetro è un processo completamente manuale. Disponibile nella versione a sospensione in due misure, con sorgente luminosa tradizionale e LED.

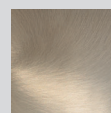

A collection with simple forms, made unique by the precious craftsmanship that uses a horizontal internal membrane, which divides the transparent crystal sphere into two halves. Each piece is unique, as the curvature of the membrane during the glassblowing process is entirely manual. Available in suspension version in two sizes, with traditional and integrated LED light sources.

Elegante gioco di geometrie ed incastri circolari dalla forte connotazione decorativa, che arreda ed illumina l'ambiente con una personalità decisa ma discreta. La fonte luminosa a LED è molto efficiente e completamente nascosta nella struttura. L'illuminazione diretta definisce la zona di luce sottostante, esaltando la naturale bellezza delle tonalità fumé e cristallo impregiate da finiture nickel nero e rame satinato.

An elegant game of geometries and circular joints with a strong decorative connotation, which embellishes and illuminates the room with a strong but discreet personality. The LED light source is very efficient and completely hidden in the structure. The direct lighting defines the area of light underneath, enhancing the natural beauty of the smoked and crystal tones, which are embellished with matt black nickel and copper finishes.

La collezione Pod è resa preziosa da giochi di traslucidità e trasparenza che vengono esaltati dalla nuova sorgente Led. La macchia bianca nella parte centrale del diffusore è una lavorazione completamente artigianale che fa sì che assuma ogni volta geometrie diverse così da rendere ogni lampada un pezzo unico e irripetibile.

The Pod collection is characterized by translucent and transparent finishes that are enhanced by the new LED source. The white spot in the central part of the diffuser is a completely handcrafted process. This is the reason why it is different in every item, making each lamp a unique and unrepeatable piece.

Collezione sofisticata ed elegante. Nella versione a sospensione può essere utilizzata come elemento singolo, nella versione con cluster lineare o con rosone tondo, oppure come chandelier. In questa configurazione il cavo in tessuto consente di fissare a soffitto le sfere in vetro soffiato rigato, disponibili in tre dimensioni, utilizzando cavetti d'acciaio per creare giochi di luce sempre diversi.

A sophisticated and elegant collection. In the suspension version, it can be used as a single element, in a linear cluster version, with a round ceiling canopy, or as a chandelier. The Chandelier configuration allows the ribbed blown glass spheres available in three sizes to create ever-changing light effects due to installation using elegant fabric-covered feeding cables and aircraft steel cables to suspend the globes.

Nella collezione Riflesso la semplicità e la leggerezza del vetro diventano protagoniste in tre diverse forme sinuose. Le silhouette del diffusore vengono esaltate dalla sorgente luminosa a LED. Le sospensioni, presentate assieme o singolarmente, caratterizzano l'ambiente con eleganza. La sospensione SP 2 è stata rivista ed equipaggiata di un secondo LED per permettere una migliore diffusione della luce.

In the Riflesso collection, the simplicity and lightness of glass become the main features with three different curved shapes. The silhouettes of the diffusers are enhanced by the LED light source. The pendants, presented together or separately, characterize the environment with elegance. The SP 2 pendant lamp has been redesigned and equipped with a second LED for better light diffusion.

Le tipologie **PP P** e **PP M** prevedono un diffusore e un frame metallico con funzione estetica. Il diffusore verrà installato in corrispondenza del punto luce predisposto a parete/soffitto. I diffusori sono i vetri della Sogno PP30 e PP42.

Le tipologie **PP 2P**, **PP 2M** e **PP MP** prevedono due lampade installate separatamente e un frame metallico cablatto internamente che permette l'elettrificazione di entrambi gli apparecchi utilizzando un unico punto luce predisposto a parete/soffitto. A questi prodotti possono essere abbinati altri due frame metallici estetici da installare in corrispondenza dei vetri diffusori.

Il frame metallico estetico è un elemento indipendente dalla lampada, previsto di distanziali h 4 cm e verrà collocato esternamente in modo adiacente al diffusore.

*The **PP P** and **PP M** types include a diffuser and a metal frame with an aesthetic function. The diffuser will be installed at the light point provided on the wall/ceiling. The diffusers are the glass panels of the Sogno PP30 and PP42.*

*The **PP 2P**, **PP 2M**, and **PP MP** models feature two separately installed lamps and a pre-wired metal frame that allows both fixtures to be powered using a single electrical connection on the wall or ceiling. Additionally, two aesthetic metal frames can be paired with these products, to be installed in alignment with the diffuser glass.*

The aesthetic metal frame is an independent element from the lamp, equipped with 4 cm / 1,6" high spacers, and will be placed externally adjacent to the diffuser.

Due frame dalla forma geometrica ed essenziale. Due figure diverse che possono essere installate a soffitto o parete, singolarmente o insieme per formare composizioni a due o più elementi. All'interno il diffusore bianco satinato nasconde la sorgente LED, che permette una luce diffusa e non abbagliante.

Two frames with a geometric and essential shapes. Two different figures that can be installed on the ceiling or on the wall, individually or together to create compositions of two or more elements. Inside, the white satin-finish diffuser hides the LED, which provides diffused, glare-free light.
